

B02006.

## ASIAN ALONE BY SELECTED GROUPS

- Universe: TOTAL ASIAN ALONE POPULATION

Data Set: 2004 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Washington State		
	Estimate	Lower Bound	Upper Bound
Total:	381,867	372,860	390,874
Asian Indian alone	41,144	31,649	50,639
Bangladeshi alone	0	0	503
Cambodian alone	20,438	13,934	26,942
Chinese alone, except Taiwanese	73,108	59,373	86,843
Filipino alone	67,330	55,013	79,647
Hmong alone	1,341	0	3,489
Indonesian alone	1,630	133	3,127
Japanese alone	34,011	27,092	40,930
Korean alone	47,809	36,916	58,702
Laotian alone	14,764	7,097	22,431
Malaysian alone	1,096	0	2,234
Pakistani alone	1,406	0	3,091
Sri Lankan alone	334	0	715
Taiwanese alone	2,149	454	3,844
Thai alone	7,223	3,682	10,764
Vietnamese alone	56,079	43,699	68,459
Other Asian	10,408	6,758	14,058
Other Asian, not specified	1,597	430	2,764

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The "Total" category includes people who only reported Asian by specifying one or more detailed Asian groups or by responding with a generic term such as "Asian" or "Asiatic."

The "All other specified Asian groups" category includes people who only reported one specified Asian group not shown above as well as people who reported two or more specified Asian groups.

### Explanation of Symbols:

1. An "\*\*\*" entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An "\*\*\*\*" entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An "-" entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An "\*\*\*\*" entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An "\*\*\*\*\*" entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The "Total" category includes people who only reported Native Hawaiian or Other Pacific Islander by specifying one or more detailed Pacific Islander groups or by responding with a generic term such as "Pacific Islander."

The "All other specified Polynesian" category includes only people who reported one specified Polynesian group not shown above.

The "All other specified Micronesian" category includes only people who reported one specified Micronesian group not shown above.

The "All other specified Melanesian" category includes only people who reported one specified Melanesian group not shown above.

The "Other Pacific Islander" category includes people who only reported as Native Hawaiian or Other Pacific Islander by specifying one or more Pacific Islander groups or by responding with a generic term such as "Pacific Islander."

**Explanation of Symbols:**

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
